WHAT IS A CARE PLAN?

Once your website is up and running, you'll want to keep it safe and secure.

Nettl Care Plans are an easy way for you to make sure that's the case, but also provides peace of mind should the worst happen.

We can keep your website up-to-date with the latest security and usability improvements. With regular planned preventative maintenance, you can protect your site against unscrupulous individuals who seek to exploit your wonderful website.

If the worst does happen, we'll restore your website back to its shiny best.

Technology won't stand still though, so to make sure your site continues to run like clockwork you'll need to keep updating software and plugins. We'll do that, each month. And send reports about updates we make, keeping you abreast of all the improvements and how they are likely to affect functionality.

PROTECTION
Safe & secure
